SUMMARY

Full Stack Developer with 2+ years of experience building web and mobile apps with the MERN stack (MongoDB, Express, React, Node.js), Next.js and React Native. Published apps on the App Store and Google Play. Available immediately.

TECHNICAL SKILLS

- **Languages**: JavaScript, TypeScript, Python, SQL
- **Frameworks & Libraries**: React, Next.js, React Native, Node.js, Express, NestJS, FastAPI, Tailwind CSS, State Management
- **Backend & APIs**: REST APIs, Microservices, API Design, Role-Based Access Control, Third-Party and Payment Gateway Integration
- **Databases**: MongoDB, PostgreSQL, Firebase
- **Tools & Cloud**: Git, GitHub, Docker, AWS, Google Cloud Platform, Jira, Postman
- **Practices**: Agile/Scrum, Unit Testing, Code Reviews, Performance Optimization, Client Communication

EXPERIENCE

Techtimize **Oct 2025 – Sep 2026**

Full Stack Developer

- Shipped web and mobile features for production client projects, cutting average delivery time per feature by **30%**.
- Designed a microservice-style backend with clear API schemas, which reduced integration time; connected Meta and Google APIs to product features.
- Handled client communication: gathered requirements, reported progress, and turned business needs into delivery plans.
- Worked with designers, frontend developers, and QA engineers on Figma handoffs and testing cycles to deliver features on time.
- Took part in code reviews and architecture discussions; used Claude Code and Cursor to speed up development and testing.

Euphoria XR **Jun 2024 – Oct 2025**

Full Stack Developer

- Shipped cross-platform mobile apps from feature design to App Store and Play Store release, and built web apps with payment integration, Firebase, and Google APIs.
- Built an AI calling bot using Twilio and AWS Polly with real-time voice conversations.
- Contributed to EmpowerID, an Identity Governance platform with **10,000+ users**, building UI components and API integrations for access control workflows.
- Cut load time from **3.5s to 1.5s** across web and mobile using lazy loading, API response caching, and database query tuning.
- Owned production support and releases for web and mobile products, cutting average issue resolution time.

360HR (Remote) **Aug 2024 – Jan 2026**

Full Stack Developer (Part-Time)

- Built a B2B SaaS job portal and ATS used by **hundreds of companies**, covering job posting, hiring pipelines, recruiter analytics, and HR document workflows.
- Integrated payment gateways for billing and subscriptions, and government compliance APIs for employment verification and regulatory checks.
- Designed secure REST APIs with role-based access and tuned database indexes, cutting candidate search time from **3s to 0.8s**.
- Built React dashboards, wrote tests, and documented the system architecture.
- Added admin analytics that generate recruitment trend reports and hiring summaries, saving recruiters time every week.

EDUCATION

University of Lahore **Sep 2020 – Jul 2024**

BS, Computer Science

LANGUAGES

English, Urdu
