Affan Zahid

Software Engineer | Full-Stack | React, Next.js, Node.js, TypeScript

(+92) 331-4906039 | zahidaffan72@gmail.com | github.com/AffanZahid804 | linkedin.com/in/affan-zahid

CAREER PROFILE

Software Engineer with 3+ years of experience architecting multi-tenant SaaS platforms, real-time systems, and production web/mobile applications for international clients across SaaS, real estate, healthcare, hospitality, and social platforms.

Strong background in clean architecture and end-to-end delivery, from requirement gathering through production deployment, building scalable, high-performance backend systems.

Skilled in direct client communication across time zones: requirement gathering, demos, and progress reporting for distributed teams.

Leverages AI-assisted development tools (Claude Code, Cursor) with structured prompt engineering to accelerate delivery without compromising code quality.

CORE COMPETENCIES

Languages: TypeScript, JavaScript, Python, SQL, C++

Frontend: React.js, Next.js, React Native, Tailwind CSS, HTML/CSS

Backend: Node.js, NestJS, Express.js, REST APIs, Prisma ORM

Databases: PostgreSQL, MongoDB, Firebase, Supabase, Database Migrations

Cloud & DevOps: AWS, Google Cloud (GCP), Firebase (FCM, Auth, Firestore), Docker, Git/GitHub, CI/CD

AI Development: Claude Code, Cursor, Prompt Engineering, RAG Pipelines, Vector Databases, LLM API Integration

Tools & Soft Skills: Jira, Trello, ClickUp, Postman, Socket.io, Client Communication, Agile/Scrum, Remote Teamwork

PROFESSIONAL EXPERIENCE

Techtimize | Software Engineer

Oct 2025 – Present

Lahore, Pakistan

- Own end-to-end delivery of full-stack production web applications for business clients, architecting microservices-based backends with NestJS and PostgreSQL and deploying to AWS alongside React.js/Next.js frontends.
- Architect responsive, component-driven interfaces backed by RESTful APIs, handling authentication, admin panels, role-based access control, and payment gateway integrations including Stripe to power core business workflows.
- Drive delivery speed by integrating AI-assisted tools (Claude Code, Cursor) with structured prompt engineering without compromising code quality; act as primary client-facing engineer, translating business requirements into technical architecture and leading solution demos.

360HR | MERN Stack Developer

Aug 2023 – Jan 2026

Remote · Part-time / Contract

- Own the end-to-end architecture and development of an enterprise job portal and applicant tracking system (ATS) on the MERN stack, covering job posting, candidate search, applicant pipelines, and recruiter analytics.
- Design and secure RESTful APIs with Node.js and Express.js to power job workflows, applications, and notifications, implementing JWT-based role-based access across admin, recruiter, and applicant roles.
- Engineer performant MongoDB schemas, aggregation pipelines, and indexing strategies for fast search across large candidate datasets, while integrating email notifications, resume uploads, and reporting; lead requirement discussions and sprint demos directly with international stakeholders.

Euphoria XR | Software Engineer

Jun 2024 – Oct 2025

Lahore, Pakistan

- Owned development of a production React Native social app end-to-end, delivering location-based discovery, real-time chat, friend management, user profiles, and event workflows to a live user base.
- Architected a scalable real-time chat module with Socket.io, handling reliable message delivery, presence tracking, and low-latency communication, and integrated RESTful APIs powering core app features, user data, and events.
- Built and maintained the Node.js/MongoDB backend, including a reels-based discovery feature enabling users to browse and apply to job opportunities through short-form video, backed by optimized, scalable queries.

PROJECTS

Entry Club | Multi-Tenant Web & Mobile Platform *Next.js, NestJS, React Native, OAuth, Payment Gateways*

Architected and built a full-stack multi-tenant platform end-to-end, from Next.js/React web frontends and reusable component libraries through loosely coupled, microservice-ready NestJS backend services. Integrated Meta APIs, Google APIs, OAuth, push notifications, analytics, and payment gateways, designing the data model and service boundaries for scalability and tenant isolation across multiple clients.

360HR | B2B HR & Recruiting Platform *React, Node.js, MongoDB, REST APIs*

Built a B2B SaaS platform connecting companies and applicants through role-based dashboards for recruiters, HR staff, and candidates, with job postings, candidate pipelines, applicant profiles, interview scheduling, and onboarding workflows tied together via a career portal. Live at 360hr.io.

Tawabiq | Real Estate Platform *Next.js, NestJS, PostgreSQL, SSR, Geolocation*

Built a complete real estate platform spanning three connected experiences on a shared backend: a public marketplace (posting, search, favorites, map/geolocation search); a broker management system (leads, communications, appointments, commission tracking, transactions); and an enterprise admin panel with role-based dashboards, listing approvals, content moderation, reporting, and audit logs, architecting the data model and access control to support all three from a single platform.

Vumi | Cross-Platform Mobile Application *React Native, Node.js, MongoDB, Firebase, Stripe*

Developed a cross-platform social app in the style of LinkedIn, with a professional feed, short-form reels for discovery, real-time direct messaging, in-app Stripe-style checkout, authentication, and Firebase push notifications (FCM). Available on the App Store as Vumi Agent Central.

HealthCare Companion | Mobile Health & Wellness App (Published)

React Native, Firebase, Sign in with Apple, Google Play Billing, Apple Pay

Built and published a cross-platform React Native healthcare app to the Google Play Store and Apple App Store, with a Firebase backend (Auth, Firestore, FCM) and an admin panel for content and user management; implemented Sign in with Apple alongside standard authentication for iOS compliance. Available on the App Store as BetterMan by Natural Jackson.

- Designed a guided onboarding flow into structured health courses with a real-time XP/points system, streak-based habit tracking, and gamified achievement badges to drive daily engagement.
- Delivered curated health tips and a progress dashboard (XP, points, course completion) with push-notification reminders (FCM) for pending courses and streaks, in a fully responsive UI across phone/tablet.
- Integrated in-app purchases via Google Play Billing (Play Console) on Android and Apple Pay/StoreKit on iOS for premium course and content unlocks.

AI Calling Bot | Voice Automation with RAG *Python, RAG, Vector DB, LLM APIs, STT/TTS*

Built an AI-powered calling bot for automated voice conversations end-to-end, designing the speech-to-text and text-to-speech pipelines alongside a RAG pipeline (vector database, embedding-based semantic search) for real-time context retrieval, LLM API integration, and conversation state management across multi-turn calls. Live at ultranivo.com.

Ishout | Creative Branding & Marketing Agency Platform *Full-Stack, React/Next.js, Node.js*

Built the full-stack website end-to-end for Ishout, a UAE-based creative branding and digital marketing agency, covering frontend, backend, and content presentation. Live at ishout.ae.

LiliHo | AI Guest Communication Platform *Full-Stack, AI/LLM, WhatsApp Integration, Multilingual*

Built the full-stack platform end-to-end for LiliHo, an AI virtual assistant that automates vacation-rental guest communication across WhatsApp and other channels in 150+ languages, architecting PMS integrations and a unified inbox that lets property management teams manage all guest conversations from one place. Live at liliho.com.

Additional Projects: French Riviera Travel (travel content platform, Next.js) · Instant Custom Boxes (e-commerce landing & quote flows, React.js) · Bitrix24-Based CRM (task & workflow automation) · T-Mobile (real-time collaborative task tool, React.js/Node.js).

EDUCATION

B.S. in Computer Science

University of Lahore · Lahore, Pakistan · Sep 2020 – Jul 2024
